

Be there

When the world fades
You lay your head down somewhere
You've got a fail grade
And you move your face to nowhere

When you call me
I won't be on my way
When you call me
I'm already there
I'll stay

When the world fades
You lay your head down somewhere
Just a small trace
But it will keep your eyes from nowhere

When you call me
I won't be on my way
When you call me
I'm already there
I'll stay

Who am I to leave you lonley
Who am I to let you there
Who am I to not be with you
Despite the things that you've done
